

COMPANY PROFILE

ABOUT US

Minprotech (PTY) Ltd. is a South African mineral processing company which specialises in the recovery of fine Chromite. We currently do have five active operations where we operate and maintain mineral processing plants for our clients.

Minprotech currently employs more than 120 permanent employees, and has produced over 1.4 million tons of metallurgical grade concentrate from tailings in the last 10 years. Minprotech is 26% black owned through the Siyandisa Trust.

The headquarters of Minprotech is based in Rustenburg in the North-West Province of South Africa. Facilities at headquarters include an engineering workshop which renders support services to the different sites as well as a mineral processing laboratory which has the capability of conducting full scale test work as; (i) a support service to the current operations or (ii) as part of

Our long-term goal is to become a leading, sustainable and efficient medium sized contractor operator company which add value to their clients by supplying operations and maintenance services in the mineral processing plant of the client.

The growth and sustainability of the Company will depend on: (i) in the short term, focus on efficiency and optimise processes in current operations in order to optimise value; (ii) in the medium term, investigate and keep up to date with new technology in order to upgrade or expand current processes; (iii) in the medium –long term, use expertise and experience gained in current operations to diversify into the processing of other minerals.

TECHNOLOGY

Minprotech was the first company in South Africa to utilize WHIMS technology in the recovery of fine Chromite from waste streams. The WHIMS technology is effective in recovering Chromite in the - 300 µm range. In order to supply a complete solution to the client, a combination of technologies is required. The close collaboration between Minprotech and the OEM's of the selected technologies ensure the effective and efficient implementation of offered solutions.

SERVICES OFFERED

The experienced team from Minprotech ensure a broad range of skills which compliments each other. This enables the company to provide the following services to their clients:

- Feasibility test work
- Project Management
- Process Operation

- Engineering and maintenance solutions
- Metallurgical optimisation

OUR VALUES

People

Safety – Our people are our most important asset. Maintaining a safe and healthy working environment in all our operations is our highest priority. We can proudly say that the level of accidents and injuries is exceptionally low in the company and that during the past five years no lost time injury occurred in the company.

Respect – We are committed in providing a positive working environment free of discrimination and harassment in all our operations. We act and treat each other with dignity and respect. We believe that employees who are treated with respect have a higher level of performance.

Community and the Environment

Social responsibility – We are actively engaging the local communities in the areas in which we operate by prioritizing the local population when employing staff. We also prioritise local service providers during our procurement process.

Environmental responsibility – the sustainability of all our operations is dependant on our compliance to all rules and regulations as stipulated by the authorities and our clients. We continuously strive to minimise the impact of our operations on the environment.

Integrity and Corporate Governance

The success and sustainability of Minprotech is also dependant on the trust and support from all stakeholders which include the employees, suppliers, clients, government and the communities. Therefore, Minprotech is committed to the highest level of integrity and do have zero tolerance for any form of corruption. We also aim to have the maximum level of transparency in our dealing with all stakeholders.
